

Dear FCC...We are K-LOVE radio listeners at 89.5, 89.1, and 88.5 in the Central Valley, CA. We travel frequently to Sacramento and listen to K-LOVE at various radio locations. This radio station has literally saved our lives, giving a positive, encouraging message when everything was upside-down in our lives. This was our life-line and still is to a certain extent. These FM translator dependent stations need to continue. Until national and regional computer access on all vehicles is available so these stations can easily be converted, it would be a great disservice to many radio customers such as ourselves if you were to expand the Low Power FM and eliminate these encouraging stations. The airwaves in our region are filled with foreign language stations many of us cannot easily enjoy due to translation issues, these would never be knocked off the air without a protest. They serve a community of non-English speaking Americans. Christian radio serves a community of Christian believers and sends encouraging music and clean fun to many others who happen to stop and listen. Please know and understand our gratitude for your work in the past. We know and pray a sensible solution can be found. Thank You - Beverly and Steven Richards
